Plan if you have 150 Catalogues (Letterboxing them 3 x per week)

This example is based on you 'letterboxing' **100** catalogues **3 times per week**.

You can of course do more or less than this - however you will need to be careful you don't miss out on important bonus payments!

You may wish to use a '3 day collection slip' (download retailing documents at www.globalhorizons.co.uk) – or just change the day slips each time you repackage your catalogues.

Approximate time taken each week (including delivery of goods):
12 hours

Results below are based on an average of £1 per catalogue delivered and collected.

Total catalogues delivered/collected *per Kleeneze 4-week sales period*:
1,200

Expected orders *per Kleeneze 4-week sales period*: **£1,200**

- You would earn initially **£248** (33% of SPV). You take this money before sending Kleeneze the balance.
- At the end of a *Kleeneze 4-week sales period* you will also receive an extra bonus of **£75** (10% of SPV) that will be paid directly in to your bank account.
- Giving you total earnings over a *Kleeneze 4-week sales period* of **£323 – around £6.72 per hour.**

The above of course is an example of your earnings – your results will of course be dictated by your own efforts and by working your business consistently.
