Plan if you have 150 Catalogues (Letterboxing Daily)

This example is based on you 'letterboxing' **100** catalogues per day **5 times per week** using *Tomorrow* day collection slips to get the most from your catalogues.

You can of course do more or less than this - however you will need to be careful you don't miss out on important bonus payments!

You should find you get the best results by delivering these one day - and collecting them back the very next day, then just repackage your catalogues and repeat the process again.

Approximate time taken each week (including delivery of goods):
18 hours

Results below are based on an average of £1 per catalogue delivered and collected.

Total catalogues delivered/collected *per Kleeneze 4-week sales period*:
2,000

Expected orders *per Kleeneze 4-week sales period*: **£2,000**

- You would earn initially **£413** (33% of SPV). You take this money before sending Kleeneze the balance.
- At the end of a *Kleeneze 4-week sales period* you will also receive an extra bonus of **£163** (13% of SPV) that will be paid directly in to your bank account.
- Giving you total earnings over a *Kleeneze 4-week sales period* of **£576 – around £8 per hour.**

The above of course is an example of your earnings – your results will of course be dictated by your own efforts and by working your business consistently.
