Plan if you have 200 Catalogues (Letterboxing 2 x week)

This example is based on you 'letterboxing' **150** catalogues **twice per week** using *Two day* collection slips to get the most from your catalogues.

You can of course do more or less than this - however you will need to be careful you don't miss out on important bonus payments!

Most people will use a *Two Day* collection ticket (e.g. Mon or Thurs – whichever day is next) which you will find in the retail slips document at www.ghgwebinar.co.uk then just repackage your catalogues and repeat the process again.

Approximate time taken each week (including delivery of goods):
12 hours

You will find important advice at www.PresentYourCatalogues.co.uk .

Results below are based on an average of £1 per catalogue delivered and collected.

Total catalogues delivered/collected *per Kleeneze 4-week sales period*:
1,200

Expected orders *per Kleeneze 4-week sales period*: **£1,200**

- You would earn initially **£248** (33% of SPV). You take this money before sending Kleeneze the balance.
- At the end of a *Kleeneze 4-week sales period* you will also receive an extra bonus of **£75** (10% of SPV) that will be paid directly in to your bank account.
- Giving you total earnings over a *Kleeneze 4-week sales period* of **£323 – around £6.72 per hour.**

The above of course is an example of your earnings – your results will of course be dictated by your own efforts and by working your business consistently.
